

EMPOWERING EXCELLENCE

THE REMARKABLE JOURNEY OF SHRINIWAS GROUP, NAGPUR (INDIA)
WITH LMW'S CUTTING-EDGE TECHNOLOGY

The Remarkable Ascent of Shrinivas Group of Companies

The Shrinivas Group of Companies, based in Hinganghat (Vidarbha, Maharashtra), is a testament to rapid growth and technological excellence. Under the visionary leadership of Mr. Govind Rathi and Mr. Nitin Rathi, the group has achieved remarkable milestones, significantly propelled by cutting edge technology machines from Lakshmi Machine Works (LMW), Coimbatore (India).

The Inception of a Prosperous Collaboration with LMW

Shrinivas Group embarked on its journey in 2009 with the establishment of its first ginning unit, driven by the expertise of Chairman Mr. Gopaldas Rathi, who had extensive experience in cotton handling in the Vidarbha region. This strong foundation paved the way for the group's venture into the spinning sector in 2016, marked by a strategic partnership with LMW for their inaugural unit featuring 20,064 spindles. This collaboration ignited a period of rapid expansion, propelling Shrinivas Group toward the significant milestone of nearly 100,000 spindles.

Strategic Expansion and Operational Excellence

The growth trajectory of Shriniwas Group is exemplified by the establishment of Shriniwas Spintex, followed by units Viyan Tex, Shivay Spinning, and Gaurja Spinning in the Nagpur belt of India. These expansions underscore the group's commitment to rapid growth and operational excellence, supported by LMW's cutting-edge technology and robust pre-sales and service support. LMW's contributions have been pivotal in optimizing production efficiency and maintaining high standards across all their units. In a strategic move towards vertical integration, the group acquired Raisaheb Rekchand Mohota Spinning, Weaving, and Processing Mills Limited. This group is reinforcing their prominent position in the textile industry through LMW's steadfast partnership and technological innovation.

Rapid Expansion and Operational Efficiency

In just seven years of operation, Shriniwas Group has achieved remarkable operational efficiency, managing 23,712 spindles with only 35-38 operators per shift. This efficiency has been made possible by LMW's innovative machinery, ensuring seamless operations and superior output. The rapid growth and operational excellence of the group highlight the transformative impact of LMW's advanced technology.

Superior Quality and Productivity with LMW setup

Shriniwas Group prides itself on producing high-quality yarn with impressive productivity metrics. The units achieve excellent results, with 40s KCW at 152 GPSS and 40s CCW at 160 GPSS. Leveraging LMW's advanced technology; they have achieved the highest yarn realization rates: above 74% for CCW and above 88% for KCW, setting new benchmarks in the textile industry.

Energy Efficiency and Sustainability powered by LMW's energy efficient technology

A key focus for Shriniwas Group is sustainability and energy efficiency. The group's units have achieved benchmark low power consumption, thanks to LMW's energy-efficient machinery. This not only reduces operational costs but also aligns with the company's commitment to sustainable practices.

Automation and Advanced Technology

All four units are equipped with LMW's latest automated smart technologies, including auto doffing, which significantly enhances productivity and reduces manpower requirements. These automations ensure consistent quality and the highest productivity.

Customer Testimonials

"Shriniwas Group has immense trust in LMW machines, and that is why all four units are with 100% LMW setup. In our experience, these machines are the best in terms of performance and have a significant role in our rapid growth. Automation & digitalization has reached the next level in the newly installed unit. The sales and service support is just unparalleled."

- Mr. Govind Rathi, Director

"We are witnessing tremendous gain with the latest LMW smart machines setup. Smart Ring frame with Spinpact is a real innovation and gives benchmark performance. LMW's machinery has been instrumental in our success. The automation and advanced features have allowed us to maintain high productivity and exceptional quality while reducing manpower and energy consumption."

- Mr. K. S. Sankar, Vice President

Conclusion

The success story of Shriniwas Group of Companies is a testament to the transformative power of LMW's innovative machinery and technology. Through strategic partnerships and a commitment to excellence, the group has set new benchmarks in the textile industry, showcasing benchmark performance, rapid expansion, and operational efficiency. The partnership between Shriniwas Group and LMW continues to drive growth and success, demonstrating the remarkable impact of advanced technology and visionary leadership.
